300 North Pacific Coast Hwy Suite #1060
El Segundo, CA, 90245

Section 1: Unit Overview

Top View Collapsed

Side View Collapsed

Open View – By Component

<u>The AMII Crate has seven [7] individual components that make up a complete unit in RMS. A complete AMII Crate consists of the following:</u>

- [1] R-Series-Base-AMII^^
- [4] R-Series-Bars-AMII
- [1] R-Series-R Mount-AMII (Right Mount attached to base, not interchangeable with the left)
- [1] R-Series-L Mount-AMII (Left Mount attached to base, not interchangeable with the right)

^^There are two gates attached to the base and considered supporting hardware for the base (not recorded as a separate component in RMS).

** Note- AMII Crates cannot be stored, loaded, or received in this status, but always must be collapsed. **

Section 2: Provider Count Expectations

EZRack contracted warehouse locations are expected to perform the following function:

Receiving Count and RMS System Inventory Management:

- Upon product arrival to the warehouse, the units are to be counted and verified against the BOL quantities and any OS&D exceptions noted on the physical BOL.
- Provider is expected to log into RMS in real time to take the following actions:
    - Complete BOL with actual quantities in WIP received.
    - Add any additional SKUs to BOL with quantities in WIP received, if applicable, to match total quantities received from the shipment.

IMPORTANT PICK UP NOTE:

Providers must call TK Dealer location to schedule a pickup appointment prior to dispatching a driver for recovery.

AMII Crates loaded into a 26' Box Truck

- Max stack height of 6 AMII Crates, collapsed
- 12 units max can be loaded into a 26' Box Truck
- AMII Crates cannot be loaded in any other configuration than the collapsed stage as seen in the picture.

AMII Crates loaded into a 53' Dry Van or Reefer Trailer

- Max stack height of 6 AMII Crates, collapsed.
- 30 units max can be loaded into a 53" Trailer.
- AMII Crates cannot be loaded in any other configuration than the collapsed stage as seen in the picture.

IMPORTANT LOADING NOTE:

*****DO NOT LOAD VERTICALLY.**

NEVER LOAD ON TOP OF ANY OTHER TYPES OF TK UNITS.

ONLY THE SAME TYPES OF UNITS CAN BE STACKED ON EACH OTHER. DO NOT STACK MIXED UNITS TOGETHER. EACH TYPE OF UNIT MUST BE IN ITS OWN STACK.***

Section 4: Storage

- AMII Crates can be stored up to 10 units high, all collapsed.
- AMII Crates cannot be stored in any other configuration than the collapsed stage.
- An AMII Crate will fill 6 pallet positions of floor space.
- Do not stack crates any higher than 10 units high.
