Section 2: Provider Count Expectations

EZRack contracted warehouse locations are expected to perform the following function:
Receiving Count and RMS System Inventory Management:

- Upon product arrival to the warehouse, the units are to be counted and verified against the BOL quantities and any OS&D exceptions noted on the physical BOL.
- Provider is expected to log into RMS in real time to take the following actions:
  - Complete BOL with actual quantities in WIP received.
  - Add any additional SKUs to BOL with quantities in WIP received, if applicable, to match total quantities received from the shipment.

Section 3: Recovery, Shipping and Receiving

IMPORTANT PICK UP NOTE:
Providers must call TK Dealer location to schedule a pickup appointment prior to dispatching a driver for recovery.

T-Series Crates loaded into a 26' Box Truck

- Max stack height 6 units, collapsed.
- 42 units max can be loaded into a 26' Box Truck.
- Ensure gates are closed and are attached properly.
  ** See Video **
- T-Series cannot be loaded in any other configuration than the collapsed stage as displayed in the picture.

T-Series Crates loaded into a 53’ Dry Van

- Max stack height 6 units, collapsed.
- 102 units max can be loaded into a 53’ Dry Van.
- Ensure both gates are closed and are attached properly.
  ** See Video **
- T-Series cannot be loaded in any other configuration than the collapsed stage as displayed in the picture.

IMPORTANT LOADING NOTE:

*****DO NOT LOAD VERTICALLY.**

NEVER LOAD ON TOP OF ANY OTHER TYPES OF TK UNITS.

ONLY THE SAME TYPES OF UNITS CAN BE STACKED ON EACH OTHER. DO NOT STACK MIXED UNITS TOGETHER. EACH TYPE OF UNIT MUST BE IN ITS OWN STACK.***

Section: 3 Storage

- T-Series crates can be stored up to 12 units high, collapsed.
- A T-Series unit will fill 2 pallet positions of floor space.
- Both gates of the T-Series unit must be in the closed position.
