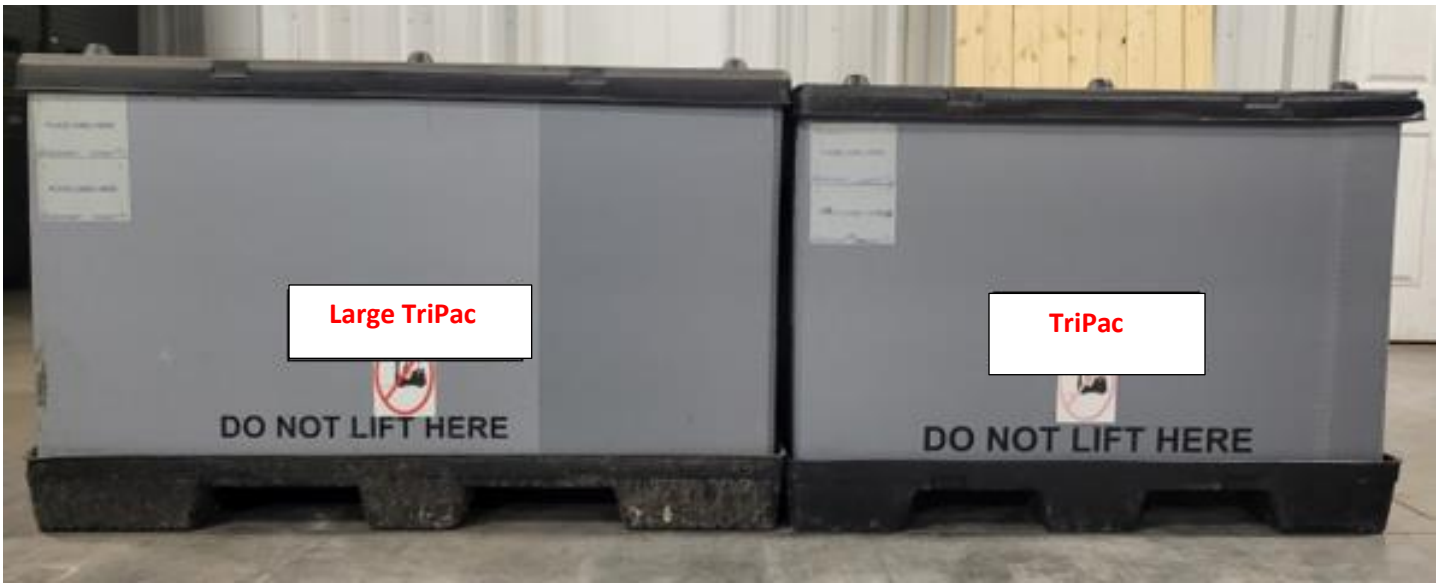
Section 1: Unit Overview

Side View



Front View

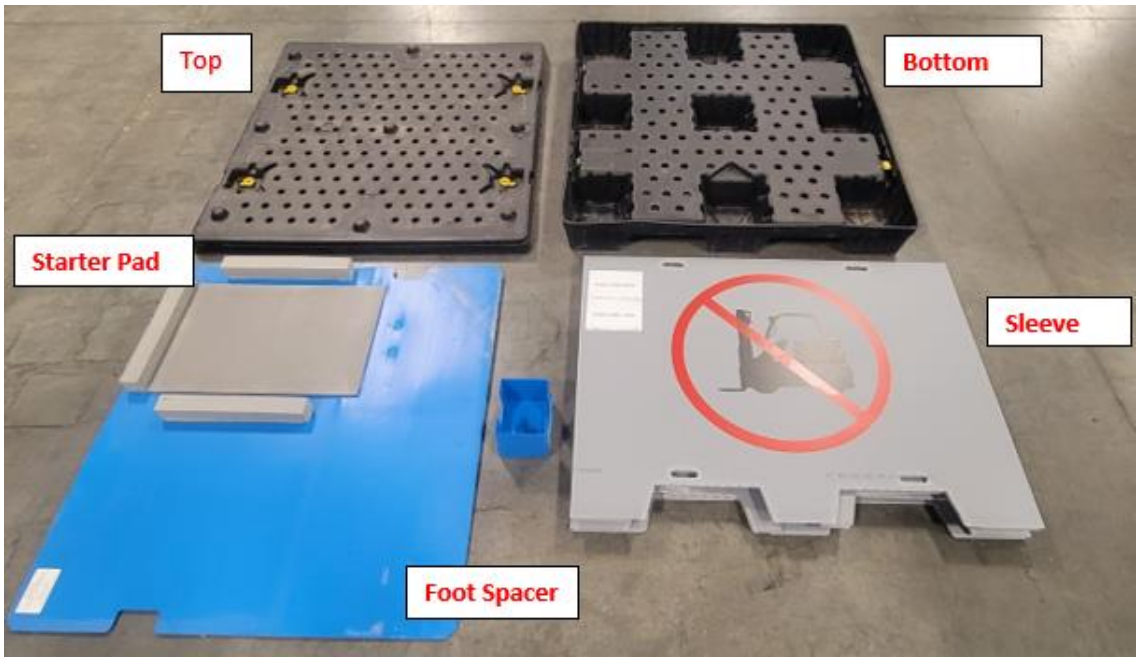
Open View – By Component

The TriPac and Large TriPac have five [5] individual components each, that make up a complete unit in RMS. A complete Tripac or Large Tripac unit consists of the following:

A complete TriPac and Large TriPac consist of the following:

- [1] TriPac Top /Large TriPac Top
- [1] TriPac Bottom /Large TriPac Bottom
- [1] TriPac Sleeve /Large TriPac Sleeve
- [1] TriPac Starter Pad / Large TriPac Starter Pad
- [1] TriPac Foot Spacer*

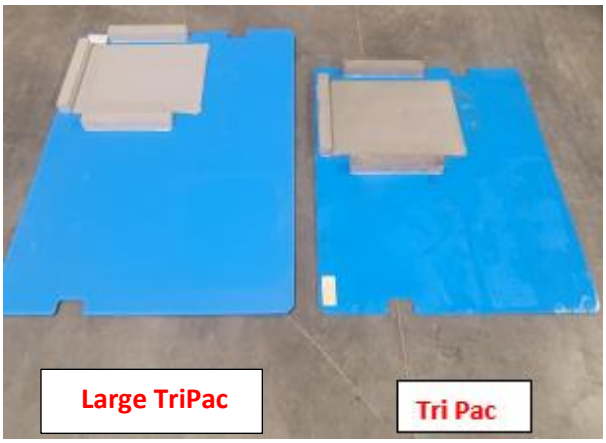
**TriPac Foot Spacer is a common component for both types of unit*

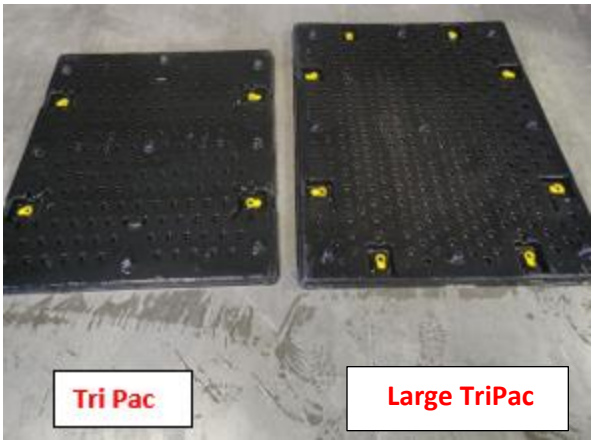


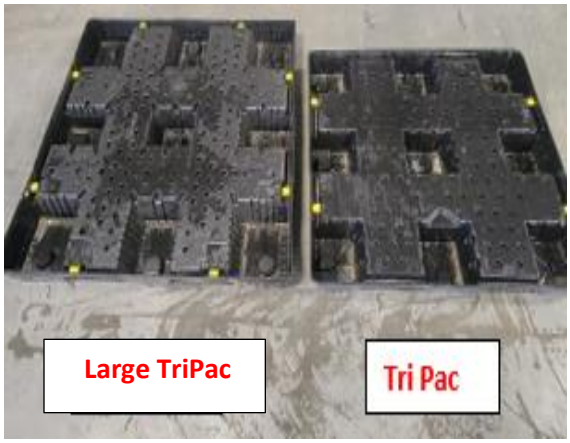
Open View – By Component TriPac vs. Large TriPac

The TriPac and Large TriPac have 5 individual components each, that make up a complete unit, but they will differ in size. Please see comparison below.

Foot spacers are the common component for both units.







- Tripac has 4 locking mechanisms and Large Tripac has eight locking mechanisms. Please be sure to correctly identify the unit and add additional required SKUs when completing BOLs in RMS (if applicable).

Section 2: Provider Count Expectations

EZRack contracted warehouse locations are expected to perform the following function:

Receiving Count and RMS System Inventory Management:

- Upon product arrival to the warehouse, the units are to be counted and verified against the BOL quantities and any OS&D exceptions noted on the physical BOL.
- Provider is expected to log into RMS to take the following actions:
  Complete BOL with actual quantities in WIP received.
  Add additional SKUs with quantities in WIP, if applicable, to BOL.

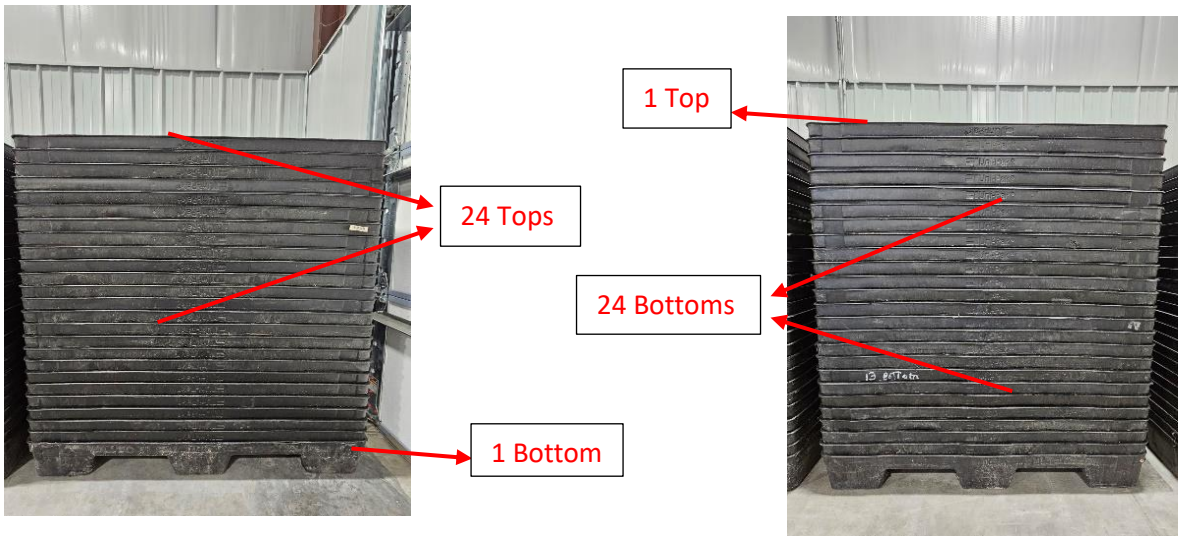
Section 3: Recovery, Shipping and Receiving

IMPORTANT PICK UP NOTE:

Providers must call TK Dealer location to schedule a pickup appointment prior to dispatching a driver for recovery.

Each TriPac that is recovered or received should be separated by component and inventoried. Once all components are separated, they should be repackaged using the following visual examples.**

I. Stack Tops and Bottoms in quantities not greater than 25 total.
   - Tops: up to 24 Tops with 1 Bottom (One Bottom used as a pallet).
   - Bottoms: up to 24 Bottoms with 1 Top (specifically if stacking for storage as noted in Section 4).



TOPS BOTTOMS

II. Use an assembled empty TriPac unit to house the following component.
- Starter Pads -Up to 22 pads inside each assembled unit.

Starter Pads – Top View

Starter Pads-Inside View

III. Use an assembled empty TriPac unit to house the following component.
- Sleeves -Up to 14 sleeves inside each assembled unit.

Sleeves - Inside View

IV. Use an assembled empty TriPac unit to house the following component.
- Up to 200-Foot Spacers in an assembled unit.

**NOTE: If there are smaller quantities of Foot Spacers, to maximize space, Foot Spacers may be place in the same crate as Sleeves or Starter Pads BUT ALWAYS PLACE ON THE VERY TOP of the stack to avoid damage.

Foot Spacers – Top View

Shipping:

TriPac and Large TriPac can be loaded into a 26’ Box Truck or 53’ Dry Van

26’ Box Truck **53’ Dry Van**

- Max stack high of assembled TriPac and Large TriPac units

26’ Box Truck-Max Stack **2 high**

53’ Dry Van-Max Stack is **3 High**

- Max stack high of TriPac and Large TriPac Tops and Bottoms

26’ Box Truck-Max Stack **1 high**

53’ Dry Van-Max Stack is **2 High**

IMPORTANT LOADING NOTE:

*****DO NOT LOAD VERTICALLY.**

NEVER LOAD ON TOP OF ANY OTHER TYPES OF TK UNITS.

ONLY THE SAME TYPES OF UNITS CAN BE STACKED ON EACH OTHER. THIS INCLUDES NOT LOADING TRIPAC ON TOP OF LARGE TRIPAC ASSEMBLED UNITS. DO NOT STACK MIXED UNITS TOGETHER. EACH TYPE OF UNIT MUST BE IN ITS OWN STACK. TOPS AND BOTTOMS STACKED TOGETHER. ASSEMBLED TRIPAC UNITS STACKED TOGETHER. DO NOT STACK TOPS AND/OR BOTTOMS WITH ASSEMBLED UNITS.***

Section 4: Storage

TriPac and Large TriPac can be stored the same:

- Assembled TriPac and Large TriPac units can be stacked 5 units high. Do not stack more than 5 units high.
- Fit up to 14 sleeves into an assembled unit.
- Fit up to 22 Starter Pads into an assembled unit.
- Fit up to 200 Foot Spacers into an assembled unit.
- Bottoms and Tops can be placed up to 3 stacks high. Do not stack more than 3 stacks high for storage.
